

ECO DOG

Dog faeces containers with bag dispenser

Eco Dog is designed for the collection of dog faeces, it is ideal for parks, city boulevards, public gardens, beaches, resorts and all places open to the public. The container has a capacity of 65 liters and is available with or without bags dispenser for collecting the excrements. Eco Dog is made of high density polyethylene using a rotational technique, thus ensuring a large resistance to impacts, aging and fading. The cover is lockable with a triangular key-type intrusion so as not to allow the insertion of hands or contact with the waste contents, avoiding further extraction by unauthorized persons. The white coloring anti-intrusion door, facilitates the visibility for the insertion of the waste. The material of the cover is made of thermoformed ASB and colored with bio components paint, that ensure the aesthetic duration in time. The base and the structure of the container are made in hot galvanized metal and can be fixed to the ground. As accessories and spare parts, are available an internal containers HDPE anti syringe to extract the waste safely, and are also available bags for the collection of the waste, produced in appropriate thicknesses and with printing instructions for use of the product. The dispenser can be equipped with a lock with triangular anti-intrusion protection key and replacement of packaging of bags. Both the container and the dispenser, are available in different colors (orange, yellow, green, red, black), so as to allow the chromatic choice more adequate to the place of destination of the structure. They are also made with customization with custom stickers covering the stem in whole or in part.
