

U-trash®

Waste Recycling Bin

Ecology Services Communication

Solutions and tools for environmental protection

U-trash is the new container for differentiated collection of waste minutes. The design of this object is inspired by the naval windsocks. The particular shape, a hollow cylinder curved at the top, is the inlet for receiving waste and natural small scraps concealed from external view. Behind the original and pleasing aesthetic impact, there is the careful study of materials and proportions that make U-trash very handy and versatile for resist to bad weather, sea salt and vandalism.

U-trash is realized with a rotational technique in a single block in high density of polypropylene.

This processing system, ensures to the container highly resistant to impact, to weather situations, sea salt and vandalism also. U-trash is equipped with brackets of safety and the capacity is of 35 liters. U-trash is ideal for furnishing both in outdoors than enclosed areas, is available in seven colors and can be customized with stickers waterproof UV-resistant.

U-trash can be used even without the help of the bag and has a range of accessories that make it suitable for many applications.

EQUIPMENT AND ACCESSORIES

Release handle, bag holder, inside ashtray with stainless steel grill, system fixed to the wall-pole or anchor base to the ground. The maintenance is easy: the inlet mouth of the container was calculated to allow the quick extraction of the bag and cleaning is feasible with using a simple mop.

U-trash is available in two kits

KIT A VERSION

U-trash basket complete with stainless steel wall bracket or pole handle, inner bag holder, fixing screws.
